YOGESHWARI SANDIP PAWAR

Associate System Engineer | Python | SQL | DBMS | AWS

Pune, India | yogeshwaripawar2003@gmail.com | github.com/yogeshwarisp | linkedin.com/in/yogeshwari-pawar

PROFESSIONAL SUMMARY

B.Tech Computer Engineering graduate (2026 batch, 9.00 CGPA) with internship and project experience in Python and SQL, building data processing workflows, API-based data collection and cloud-stored datasets on AWS S3. Strong foundation in Data Structures, DBMS and Git/GitHub, with analytical problem-solving skills shown by processing 10,000+ sales records into validated reports and dashboards. Seeking an Associate System Engineer role to build and support reliable software and systems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C
Databases and DBMS: MySQL, SQLite, SQL Joins, Aggregations, Data Modeling, Data Validation
Core Computer Science: Data Structures, Database Management Systems, Analytical Problem Solving
Cloud, APIs and Tools: AWS S3, API Integration, Git, GitHub, VS Code, Jupyter Notebook
Python Libraries: Pandas, NumPy, Matplotlib
Data Analysis and Visualization: Data Cleaning, Data Transformation, EDA, Power BI, Excel Dashboards, KPI Reporting
Statistics and ML Fundamentals: Statistics, Probability, Hypothesis Testing, Regression, Classification, Supervised Learning

WORK EXPERIENCE

Data Analytics Intern *2025*

- Wrote Python (Pandas, NumPy) and SQL code to clean, transform and validate raw multi-source datasets, improving consistency and accuracy.
- Queried relational data with SQL and applied exploratory analysis and statistical techniques to identify trends and patterns.
- Designed data models and built interactive Power BI dashboards to track KPIs and present insights to stakeholders.
- Prepared analytical reports and visual summaries to support data-driven decision-making.

PROJECTS

Weather Data Analysis System *Python, Public APIs, AWS S3, Matplotlib*

- Built a Python system that collects real-time weather data through public APIs and stores datasets in AWS S3.
- Implemented data preprocessing and multi-variable trend analysis to identify environmental patterns over time.
- Created Matplotlib visualizations and analytical summaries to present data-backed findings.

Sales Data Analysis Dashboard *Python, SQL, Power BI*

- Processed and analyzed 10,000+ sales records to identify revenue trends, seasonal patterns, growth opportunities and KPI movements.
- Applied data cleaning, transformation and validation to improve the clarity and reliability of insights.
- Built interactive Power BI dashboards for revenue, sales growth and performance monitoring.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering *2026*
Dr. D.Y. Patil College of Engineering and Innovation, Pune | CGPA: 9.00
Relevant Coursework: Database Management Systems, Data Structures, Statistics, Machine Learning

CERTIFICATIONS

- AMCAT Certification, Aspiring Minds (2025); SQL Basics, Newton School (2025)
- Power BI Workshop, OfficeMaster (2025); Skillsoft Certification, Data & Technology
- Codesoft Internship Certificate
